

Article XIV. Students with Disabilities

Students with Disabilities – Any student with a disability has the right to request reasonable accommodations in order to ensure full and equal participation in the conduct process. Students wishing to request reasonable accommodations should make those requests in advance (1-2 weeks prior to the date that the request is needed) directly to the Office of the Associate Dean of Students. Students are not required to be registered with the Disability Services (DS) office in order to request accommodations for the conduct process; however, review of supporting documentation of the disability may be required. The OADS will consult with the DS office, as needed, though the nature of the conduct issue will not be disclosed to the DS office, except to the extent that disclosure may assist in the determination of reasonable accommodations. Accommodations are determined on an individual, case-by-case basis by the Associate Dean of Students in consultation with the DS staff.
